

Solar System Tic-Tac-Toe

<p>What is a star? Describe the physical attributes of stars. Choose a particular star to research. Create a poster about your star.</p>	<p>Create a brochure that explains how the seasons change and how we get day and night. You must include text and pictures.</p>	<p>What types of technology are used to study the night sky? Choose one and create a Power Point about it.</p>
<p>What are the phases of the moon? Create a poster that includes a picture of each phase in the correct order. You must include a written explanation of the phases and how they occur.</p>	<p>Create a diagram of the Solar System. Include all planets and the Sun. Draw each planet and include dimensions.</p>	<p>Explain the difference between a planet and a star. Explain each and tell how they are different.</p>
<p>Choose one planet to research. Create a travel brochure with facts about your planet. You must include text and pictures.</p>	<p>What is a constellation? Research constellations, and choose one. Write a summary about its history, how it got its name, and where the constellation is in the sky. Be sure to include which stars make up the constellation.</p>	<p>What are asteroids and meteors? Complete a Venn diagram comparing and contrasting the two.</p>
